Troubleshooting:

All transmission distances mentioned above are without connecting image processors (e.g. Quad, Multiplexer, or DVR). The transmission range would be reduced to 100-200M upon different camera, cable, DVR...etc.

1. When there's no video signal, please check the power LED and power source.
2. When the video signal is not normal, please check the “ + ” and “ - ” of the cable.
