

One Coaxial Cable Transceiver

Model: VMS2731K

Features:

- Transmit real-time analogue video signals.
- Compact size, durable and reliable device.
- Built-in electrical transient voltage suppressor protection in the input and output.
- Using 5C-2V (Japan spec) coaxial cable can transmit 12V DC power to P/T/Z camera via one coaxial cable with a distance up to 2000ft / 600m (distance can reach up to 3200ft / 1000m without sending DC power to camera).
